SUMMARY

A dedicated software engineer with extensive experience in web development having expertise in building scalable and efficient frontend systems. My career spans various industries, where I have significantly contributed to projects, focusing on optimizing frontend functionality and performance. Known for my problem-solving abilities and innovative approach, I excel in environments that challenge my technical skills and knowledge, continually pushing the boundaries of web development to achieve remarkable business efficiencies and advancements.

EXPERIENCE

Full Stack Developer
MetaCraft

January 2024 - Present · Remote

• Developed and maintained diverse web platforms, including e-commerce sites, business, and portfolio websites, utilizing a robust tech stack.
• Successfully managed client relationships, ensuring clear communication and understanding of project requirements; this collaborative approach led to high client satisfaction and a track record of on-time delivery of projects.
• Proactively engaged in continuous learning and skill enhancement, focusing on emerging web technologies and best practices. This dedication not only improved my productivity but also directly contributed to creating more efficient, up-to-date, and innovative web solutions for clients.

Skills: ReactJS, NextJS, ExpressJS, NodeJS, TailwindCSS

Intern
Interns Pakistan

May 2023 – June 2023 · Remote

• Built modern and responsive user interfaces using HTML, CSS, JavaScript, Bootstrap, and React, enhanced application performance by optimizing the code base.
• Developed and maintained Ecommerce websites and improved website search engine rankings with Google and Bing search engine optimization strategies.
• Optimized websites rendering performance on multiple browsers including Firefox, Chrome, and Safari by utilizing debugging tools.

Skills: HTML, CSS, JavaScript, Bootstrap,ReactJS

EDUCATION

Bachelor of Science - BS, Computer Science
University of Faisalabad (TUF) • 2021-Present   **CGPA: 3.72**

• Student of TUF's Computer Science program, where I honed skills in Programming, Data Structures, Database Systems, and Software Design. My studies covered essential aspects of both theory and application in software development, preparing me for technical challenges in the software engineering industry.

SKILLS

Frontend: ReactJS, NextJS, TailwindCSS, Bootstrap
Backend: NodeJS, ExpressJS
Databases: MySQL, SQLite, MongoDB
